

Auto Thread Trimming Function

One single action automatically trims both upper and lower threads at the same time. This eliminates wastage of thread.

Box Feed - Industrial Sewing Machine Technology

In order to provide beautiful seams and outstanding feed performance, JUKI adopted box feed system. The conventional feed mechanism is oval motion. On the other hand, the box feed moves the feed dog in a box motion. This eliminates material shrinking and shifting. This accurate feeding system provides superior stitch quality for a variety of light to heavy weight fabrics.

Powerful Feeding

HZL-G series has powerful feeding thanks to a special steel feed dog and improved presser foot construction. Heavy material projects, such as hemming denim jeans, can be sewn with ease.

3-12-3 Layers of Denim

Over Bag

Handles Thin Fabric

Wide Sewing Space

The HZL-G series has a wide underarm space, more than any of our competitors in this price range. A wide table is more enjoyable and comfortable to work with large projects.

High Quality 1 Step Buttonholes

The HZL-G110 & G210 sew beautiful buttonholes on wide range of fabrics.

8 different styles of buttonholes

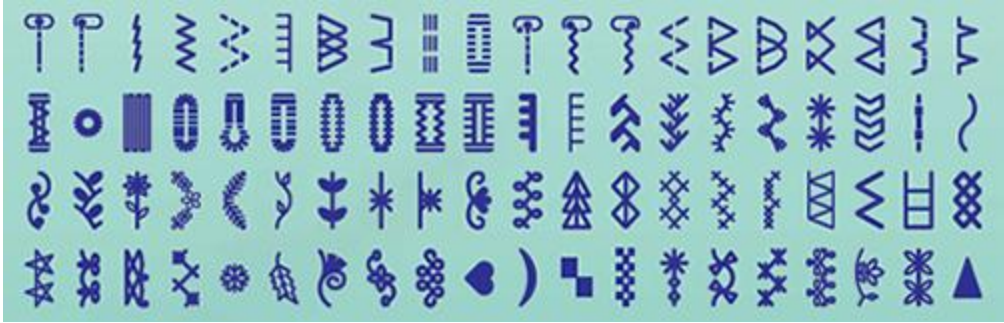

Automatic Needle Threader

The Automatic Needle Threader easily threads the needle without eyestrain and allows you to start sewing quickly.
